Tikamgarh, Madhya Pradesh

- Gained valuable experience and knowledge in 2G/3G/4G/5G technologies. Gained in-depth knowledge of efficient data transfer using optical communication.
- Acquired valuable knowledge about data networking, which encompassed routing and switching, as well as essential aspects of network security.
- Learned about installation and maintenance of fiber optic communication systems.
- Had the opportunity to know about network security practices and technologies.

## Projects

### AGRI GO

- This project provided us with the opportunity to meet with CM Ashok Gehlot.
- This project was designed with a purpose - to tackle the core challenges faced in agriculture and extend a helping hand to our hardworking farmers.
- In this project, we created a smart app that uses information about the kind of soil to predict the best crops to grow. This helps farmers have a successful harvest and do well in their farming.
